

Roskilde Business College

Personal information

My name is Ewelina Mikolajczyk and I come from Poland.

I started my education at the University of Information Technology and Management in Rzeszow, Poland with faculty Information Technology and Econometric. Hopefully in this year, I will achieve Master degree.

One year ago, I came to Denmark (Roskilde Business College) for ERASMUS/SOCRATES student exchange.

Presently, I am continuing my study in Poland and in Denmark.

Why did I go to Roskilde in Denmark?

First of all, I need to say that I always wanted to go for a student exchange. I thought, that it is the best chance to meet new interesting people, to become more independent and to broad the knowledge about new countries. My University in Poland has got a huge range of places, where I could decided to go. I have chosen Denmark, Roskilde because I thought that this is the place,

where people especially students have got a lot of great opportunities to develop themselves. Before I went to Denmark, I had read a lot about Roskilde, people and Danish culture. I found out that Denmark is nice place to go. I saw nice pictures and I thought that it will be "my place". Now I can say that I decided the best I could and I know that it is a wonderful place with warm and caring people.

Being a student in DK

In Roskilde Handelsskole (Roskilde Business College) students have got very good studying conditions. There are available plenty of computers connected to the Internet, copies machines and laser printers (for free) allowing to print a lot of materials for studies and for the projects. For more studying materials it is possible to use College library or Roskilde public library where students can borrow books from the libraries from whole Denmark. Moreover, I would like to add that almost every of the Danish students communicate easily in English. This is very important for international students. We feel comfortable, if we know that we can be understood by everybody. Danish teachers are very helpful in every situation and we treat them as our friends. What is important to add, is that education system in Denmark is a little bit different than in Poland. In Denmark we spent a lot of time on projects, which gives as opportunity to work in groups. This is amazing thing in study period. In this time we need to organize our work time efficiently, share responsibilities and work in order to achieve good results. This is very good experience which is valuable for a future career and future work. The classes are made as courses on which we have special groups and we are focus on special areas of interest. We gained deep knowledge about the study subjects. During the time in Denmark I attend in the evening, for a free Danish language course which is offered at Roskilde Language Centre. It is quite useful especially when somebody thinks about staying in Denmark for a longer period of time.

Living in Denmark

Denmark is a nice place for young people to live and to stay in.

The best advantage to spent study period in Denmark is that we can meet here people from all over the world. We can speak in foreign languages and to become more flair with international culture and customs. Moreover in Roskilde we have got a student's pub - Gimle in which we have got a lot of international parties and concerts. As a student I can be a part of the International Club and take part in preparing international café's and a lot of interesting events. They are the most common parties in international community.

Roskilde is not a big city, however we have got here cinema, sports halls, pubs and very well-know Viking Museum.

When somebody is looking for more fun and entertainments Copenhagen is waiting 24 h per day.

This capital has got a lot of places needed to be seen (Tivoli is simply a must) and is a part of the most dynamic region in Northern Europe.

What I like in Denmark and Roskilde the most? - natural with a pure air and clean water. It is very famous in having nice green spaces, a lot of parks and gardens. Everybody can feel here free, safe and very happy.

Living in Denmark in not cheap, however it is very easy to find a well-paid job. Students have got permission for work (15 -20 hours per week). Students or graduates from collages or universities easily can find good job in which they can develop knowledge and learn new things.

Usefulness

In this chapter I could write a lot of things. I am sure, that nobody has doubt that those kinds of study or travel is the best opportunity to develop and become more open for another nationalities. During this time I obtained more knowledge about myself, about my weakness and moreover about my strengths. Study and living, meeting a lot of people from Denmark and other

countries, speaking only English or Danish (a little bit right now:)) languages on a daily life, communicating with a lot of people from various parts of the world broadened my eyesight very much. It gives, so a lot of experiences and more knowledge about another cultures. When you go for a study period you can make sure, how your languages skills are, how education system works in another environment. You can learn more respect for foreigners and their culture. I am sure that this travel and student exchange is the most important in my life. It gives me a lot of new useful experiences and new look for a world. I saw here, that it is easy to be happy and now, I know why Denmark is one of the happiness places in the world!

Just do it!

Go on Erasmus exchange or do the full study programmes or work in Denmark. Do not let something stop you; this will probably be the best opportunity to travel and study in your life - -

So take the advantage and the challenge!
